

# omius

## AMPLIFY YOURSELF.

Omius technology amplifies the body's natural cooling mechanism, keeping you cool, comfortable, and performing at your best.

### QUALITY MATERIALS

Made of the highest quality elastic material for an ergonomic and comfortable fit, adjustable for all head sizes.

### DIRECT CONTACT

Uniquely designed with a silicon grid to hold the Omius cooling pieces in place and in direct contact with the skin.

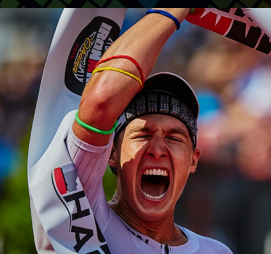

### ADAPTABLE

Cooling pieces are replaceable and easily transferable from one product to another.

## OMIUS TECHNOLOGY

When water or sweat evaporates from the surface of the skin it absorbs heat and cools the body.

Using thermally conductive and porous graphite, and a patented coating, the Omius technology increases the evaporative surface area of the skin by 5x. This amplifies the body's natural cooling mechanism and dramatically increases comfort and performance in hot conditions and during strenuous exercise.
